

ENVIRONMENTAL POLICY

AKTOR FM is a building maintenance-management company, it holds a leading position in the field of building management-maintenance and is active in environmental projects as well as infrastructural, construction, building, electromechanical, industrial, energy, etc. projects

Environmental management is part of the general philosophy of AKTOR F.M.'s business policy, but also one of the basic principles on which the company's development planning is based. With a sense of responsibility and in the context of wider environmental requirements, the Management of AKTOR F.M. proceeded with an integrated planning of operation and development of the Company with actions and programs. Based on environmental management, AKTOR FM implements an Environmental Management System (EMS) in accordance with the ISO 14001:2015 standard for the following scope:

- Design, Management, Operation, Maintenance, Technical Support and Supervision of Buildings, Facilities and Infrastructure Projects, including Construction Works
- Design, Supply, Installation, Supervision, Operation, Repair, Maintenance and Technical Support of MEP Facilities and Equipment
- Design, Construction, Operation, Maintenance and Technical Support of PV Systems
- Cleaning Services of Buildings, Facilities and Infrastructure Projects
- Snow Removal Services
- Management of Landscape Services and Irrigation Systems
- Development, Implementation and Maintenance / Support Services of IT Projects
- Document & File Scanning and Digitization Services
- Supply, Installation, Commissioning, Operation and of Control Systems and Telemetry Projects
- Design and Implementation of Energy Upgrade & Energy Saving Projects and Infrastructure Energy Management

In this context and based on the broader philosophy of the company, **the Management of AKTOR F.M. is committed to:**

- Compliance with all current national and European legislative and other regulatory requirements,
- Commitment to fulfill the compliance obligations related to the environmental aspects of the Environmental Management System,
- Continual evaluation of the Environmental Impact of our activities
- Commitment to take preventive measurements in order to avoid emergency situations
- Integration of environmental issues in the design of new activities
- Continuous improvement of the environmental performance and contribution to the sustainable development,
- Protection of the environment, including prevention of pollution, mitigation and adaptation to climate change, sustainable use of resources, protection of biodiversity and ecosystems.

- Responsible operation with full knowledge and evaluation of the effects of the production process on the Environment, and
- Environmental education, training and motivation of the staff for active participation in the protection of the Environment.

The targets of the Environmental Policy are:

- Minimization of waste through recycling, reuse and control of generated waste,
- Prevention of pollution through the application of more environmentally friendly technologies as well as construction methods.
- Minimization of noise, vibrations and other nuisances through integrated planning of project implementation, in order to decrease the general impacts on society, traffic, public networks, protected areas, etc.,
- Protection of archaeological sites and monuments of our cultural heritage,
- Rehabilitation of green sites and landscape of the projects in general through environmental programs according to the approved environmental studies and environmental conditions of the project each time,
- Rational management of raw materials for the construction of projects and wise use of natural resources in general, such as energy, water etc.,
- Aesthetic upgrading and harmonic integration of the construction sites in the immediate and wider environment wherein the projects of AKTOR FM are implemented,
- Safety of employees and assurance of those conditions that contribute to the balanced approach of problems due to the interaction between the working field and the broader environment, and
- Enhancement of the environmental awareness of the employees, through continuous educational and training courses.
